DETAILED ACTION

Allowable Subject Matter

Claim 1 - 45 allowed.

Regarding claims 37 - 41, the following is a statement of reasons for the indication of allowable subject matter: The nearest prior art is Berger et al. US 6,088,152 which teaches approximately linear pre-emphasis. Berger fails to teach the limitations "providing at least two mutually exclusive wavelength bands, each having at least two channels, and wavelengths of the respective wavelength bands having approximately equal channel powers" and "wherein approximate channel powers of the shorter wavelength band is greater than approximate channel powers of the longer wavelength band".

The instant invention is directed to pre-emphasis based on bands, resembling a step function, rather than a pre-emphasis based on channel powers, resembling a substantially linear slope.

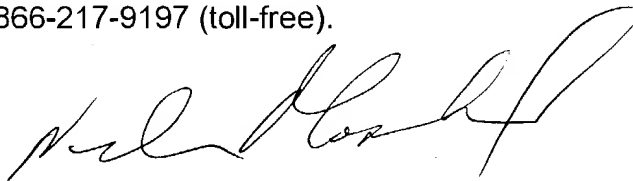

Regarding claims 1-36 and 42-45 see reasons for indication allowable subject matter in the Office Action mailed on 30 December 2003.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen C. Cunningham whose telephone number is 703-605-4275. The examiner can normally be reached on Monday - Friday.
